PROFILE SUMMARY

As lead programmer for Waterford Robotics Team 3098, I thrive in high-pressure environments, specializing in coding, system integration, and rapid problem-solving. I'm also enrolled in OSTC-NE's programming course, where I explore cybersecurity and AI with a mindset that challenges conventional thinking. My leadership experience as Senior Patrol Leader of Troop 810 has taught me to lead with integrity and build strong teams. Whether behind a keyboard or in the field, I'm driven to innovate, support others, and leave every system better than I found it.

EDUCATION

2022-present
WATERFORD KETTERING HIGH SCHOOL

2024-Present
Oakland schools technical campus
